

## MYSTOLENE FT

### Leather Auxiliary Product Data

<b>Function</b>	An organic filling and tightening agent for leather with a mild tanning effect.									
<b>Composition</b>	High molecular weight synthetic organic fillers in the form of an aqueous solution.									
<b>Description</b>	A light brown liquid readily soluble in water.									
<b>Suggested Uses</b>	<p>Mystolene FT is used where it is necessary to produce a tighter, fuller leather. However, its versatility is such that it may be used to achieve a pleasant and round handle even on Nappa and suede sheepskins.</p> <p>The product tightens fibre structures on grain leathers without interfering with firmness or softness of handle. A full and mellow handle can be achieved together with an increase in substance.</p> <p>Mystolene FT is particularly successful on bovine hides for heavyweight softy production where the offal areas would otherwise be of inferior quality.</p> <p>Mystolene FT is normally added prior to the fat-liquor bath and is run in the drum for 15 - 30 minutes. When the dye/fat-liquor bath is acidified finally, fixation of the Mystolene FT also takes place, unlike many organic filling and tightening agents.</p> <p>Mystolene FT gives an improvement in the fineness and evenness of the nap of suede leathers on subsequent buffing or wheeling.</p>									
<b>Application</b>	<p>Suggested application levels for Mystolene FT are as follows:</p> <table><tr><td>Bovine stock</td><td>:</td><td>5% - 7% depending upon substance</td></tr><tr><td>Ovine stock</td><td>:</td><td>5% - 8% depending upon substance and origin</td></tr><tr><td>Suede splits</td><td>:</td><td>5% - 7% depending upon substance</td></tr></table>	Bovine stock	:	5% - 7% depending upon substance	Ovine stock	:	5% - 8% depending upon substance and origin	Suede splits	:	5% - 7% depending upon substance
Bovine stock	:	5% - 7% depending upon substance								
Ovine stock	:	5% - 8% depending upon substance and origin								
Suede splits	:	5% - 7% depending upon substance								
<b>Handling</b>	<p>Avoid contact with skin and eyes. For further information see product Safety Data Sheet.</p> <p>This product will deteriorate if frozen. Appropriate storage conditions should therefore, be arranged.</p>
