MYSTOLUBE AMS

Textile Auxiliary Product Data

Function	Softener, lubricant.
Composition	A micro-emulsion of an amino-modified silicone.
Description	A non-ionic, translucent mobile emulsion readily dispersible in water. Solids content 30% nominal.
Suggested uses	Mystolube AMS has been formulated to have excellent shear stability so that it may be applied using most textile finishing equipment. The product is diluted in water prior to use but only sufficient material for one day's production should be diluted at a time.
Concentration	1% - 3% Mystolube AMS on weight of fabric according to handle characteristics required.
Application	Mystolube AMS has been developed specifically for use in textile softening. It imparts exceptional softness to fabrics whilst minimising yellowing. Mystolube AMS is effective on a variety of fabrics including 100% cotton, polyester/cotton blends and 100% synthetics.
Handling	Avoid contact with skin and eyes. See product Safety Data Sheet for further information. This emulsion will deteriorate if frozen. Appropriate storage conditions should therefore be arranged.

Issue 3 April 2001

*Mystox, Mystolene, Mystolube and Mystozyme are registered Trade Marks of Catomance Technologies Limited
