MYSTOZYME SO

LEATHER AUXILIARY PRODUCT DATA

Function	A soaking enzyme based on proteolytic enzymes. Assists in the rehydration of wet salted or dried hides by degradation of interfibrillary protein, thus facilitating water absorption.
Composition	Protease enzymes in liquid concentrate form.
Description	Clear brown liquid.
Application rate	For re-soaking of wet salted hides, Mystozyme SO should be added at 0.003% on weight of hide.
Handling	Avoid contact with eyes and skin. See Safety Data Sheet for further information.

Issue 1 May 2002
