## **Catomance becomes exclusive distributor for Linsegal WRD**

Catomance Technologies Ltd has been appointed as exclusive distributor for Linsegal WRD in the United Kingdom and Republic of Ireland.

Developed by Chemie Impex of Reutlingen, Germany, Linsegal WRD is a new innovation for the rapid dyeing of wool. In conjunction with Wools Research Organisation of New Zealand (WRONZ), the use of Linsegal WRD in wool dyeing has been commercialised in a number of countries.

Through technical innovation, Linsegal WRD allows improved dyehouse productivity. It reduces dyeing times by up to one half, helps to minimise wool damage and additional savings result from lower energy use. Linsegal WRD can be used to dye loose stock, tops, fabric and yarn and is compatible with most dyeing auxiliaries.

Catomance Technologies is an international supplier of speciality finishing agents for the textile industry including insect resistant, mildew resistant and water repellent treatments.
