CHARTERED SCIENTISTS AT CATOMANCE TECHNOLOGIES

Two of the technical team at Catomance Technologies have been awarded the designation Chartered Scientist (CSci) by The Science Council. The company's Technical Manager, David Morgans and his colleague Karen Barfield registered for CSci through the Royal Society of Chemistry (RCS).

The award of CSci is particularly relevant for a growing number of scientists including David and Karen who work in an interdisciplinary environment. On any day at Catomance, they will find themselves crossing and re-crossing the boundaries between formulation science, analytical chemistry, textile finishing, leather processing and highways engineering.

The CSci qualification reflects best practice in science and is set at a benchmark level throughout the science professions. Holders of the qualification are able to show an awareness of new insights in their field of professional practice.

With an increasing focus on research and development in interdisciplinary areas, it is vital for scientists to have professional recognition that is applicable across a range of scientific skills and experience.
