REFURBISHMENT OF MILITARY TENTS

A new product from Catomance Technologies Ltd. is ensuring that UK military forces have reliable tents and shelters.

Using Catomance's Mystox TRP, a programme of refurbishment of the Ministry of Defence's tent stock is taking place. Supplied in the form of a thixotropic emulsion and simply applied by roller or brush, Mystox TRP treatment returns service-worn tents to an "as new" condition at a fraction of the replacement cost.

Mystox TRP re-proofs the tent fabric, restoring its original shade, water resistance, flame retardency, rot resistance and infra-red reflectance signature.

The introduction of Mystox TRP reinforces Catomance's commitment to the development of textile protection technologies. Based upon low-dose active ingredients with minimal environmental impacts, the Mystox TRP treatment is highly durable under in-service conditions.
