CATOMANCE ON PARADE

Catomance Technologies took part in the Defence Clothing Customers exhibition held recently at the Defence Logistics Organisation site at Caversfield.

The aim behind this unique exhibition is to help users discover what is new in protective equipment, systems and clothing. Customers present during the two-day exhibition represented all the Armed Forces, the Ministry of Defence, police, fire and ambulance services.

Catomance demonstrated the use of its innovative product Mystox TRP for tent refurbishment. Easily applied by roller or brush, Mystox TRP has been designed to restore service-worn tents to an "as-new" condition at a fraction of the replacement cost.

A current MoD programme re-treats tents returned from service in battle theatres. Mystox TRP treatment reproofs the tent fabric, restoring its original colour, water resistance, flame retardency, rot resistance and infra-red reflectance signature.

This was the third year for the DCC exhibition and all who attended agreed that it was the best so far.
