CATOMANCE LAUNCHES SUBTANTIVE ANTIMICROBIAL FINISH

A new addition to its range of antimicrobial finishes has been announced by Catomance Technologies.

Mystox SR Conc. has been specially designed for substantive treatment of textiles, particularly yarns in hank or package form. Based on low-dose active ingredients with minimal environmental impacts, Mystox SR Conc. is suitable for application in conventional package dyeing machines.

Economical in use, Mystox SR Conc. is supplied in the form of a self-emulsifying concentrate with cationic character.
