

MYSTOLUBE STL NEW

Textile Auxiliary Product Data

Function Thread lubricant.

Composition An aqueous emulsion of silicone oils.

Description Free-flowing, white emulsion readily dispersible in water.

Total Solids Content	22% nominal
Ionic Character	Nonionic
pH	Approximately 7

Suggested Uses Treatment of sewing threads. The product is a specially formulated blend of silicone oils and provides a balance of static and dynamic lubrication essential to good sewing thread performance.

Application Mystolube STL NEW may be applied by impregnation.

For impregnation, a bath concentration of 10 - 30 gm per litre Mystolube STL NEW at a wet pick-up of 60% - 70% is suitable.

For other application routes, testing is recommended to ensure suitability.

Handling Handle according to good industrial hygiene practice.
For further information see product Safety Data Sheet.
This emulsion will deteriorate if frozen.
Appropriate storage conditions should therefore be arranged.
