

# MYSTOZYME ABL NEW

## LEATHER AUXILIARY PRODUCT DATA

**Function** Enzymatic acid bating agent for hides and skins in the pH range 2.5 ó 7.0.

### Fields of

#### Application

Mystozyme ABL can be used for acid bating of a variety of hides and skins. It is particularly suitable for pickled sheepskins and can be successfully applied to Double Face. Use of the product can give one or more of the following advantages:

- Softer leather
- Improved area yield on poorly bated pelts
- Even dyeing
- Improved tanning agent uptake
- Wrinkle removal

**Composition** A protease enzyme produced from submerged fermentation of an *Aspergillus* species.

**Description** Brown liquid.  
**Colour varies from batch to batch and is not indicative of product strength.**
