

MYSTOLENE PS

PAPER AUXILIARY PRODUCT DATA

Function Water repellent, water resistant surface size. Can be used in combination with starches and humectants.

Composition Paraffin wax, rosin, protein, emulsifying agents and water.

Description White, alkaline emulsion dispersible in hot water.

Total Solids : 40% nominal
pH : 7.5 - 8.0

Suggested Uses Paper, board and sterilization papers.

Concentration 0.25% to 20% on weight of dry fibre.

Application Size-press or calender stack. Off machine coating, tub-sizing. Optimum water resistance is obtained when the treated paper or board is dried above 60°C.

Handling Avoid contact with skin and eyes.
See Safety Data Sheet for further information.

This product will deteriorate if frozen. Appropriate storage conditions should therefore be arranged.
